

February 8, 2024

On February 7, 2024, Governor Ned Lamont released his recommended budget adjustments for fiscal year (FY) 2025.¹ The proposed budget adjustments contain a number of changes to the current state budget that was passed and signed into law in June 2023. These proposed changes impact policies and funding for K-12 education.

The following analysis details the changes to state education funding contained in the governor's proposed budget adjustments, and provides a brief overview of the general fiscal outlook of the state budget and economy.

Governor Lamont's proposed budget is based on an economic forecast that assumes Connecticut's economy will continue to grow in FY 2025, though at a slower rate when compared to recent fiscal years. The Economic Report of the Governor, released with the governor's proposed budget adjustments, projects personal income will grow by 4.4 percent in FY 2025, which is higher than previously projected.²

Governor Lamont's budget proposal is the first step of the midterm budget adjustment process³

- The General Assembly will review the governor's proposed budget adjustments, beginning with the Appropriations and Finance, Revenue and Bonding Committees.
- The General Assembly will make adjustments to the budget, and then the amended budget will be put to a vote by each chamber of the legislature.
- Once each chamber passes the same exact version of the budget, the budget will be sent to the governor, who will sign it into law, veto it, veto specific line items, or let it go into effect without signing.

Key Proposed Policies

- The proposed adjustments eliminate \$47.9 million in state funding for choice programs in the Education Finance Reform line item, reallocating the remaining funds to various education programs.
- The cap on general education tuition for FY 2025 (set at 58% of the FY 2024 per-student tuition levels for magnet and AgriScience sending districts) is eliminated.
- The phase-in schedule for the Education Cost Sharing (ECS) grant is maintained with town grants adjusted for changes in enrollment, student needs, and community wealth. These adjustments, which are done annually, do not

² Ibid.

³ A more detailed explanation of Connecticut's state budget process can be found at <https://schoolstatefinance.org/resources/connecticut-state-budget-process-office-of-fiscal-analysis>.

modify the ECS formula or make changes to the amount of funding towns are entitled to under the ECS formula that is currently in law.

- The governor's proposed budget recommends using \$74.3 million from the Education Finance Reform line item to fund the ECS phase-in schedule, which was accelerated last year by the legislature to provide greater funding to historically underfunded districts faster than previously scheduled.
 - Districts considered overfunded by the ECS formula are held harmless until the phase-out schedule resumes in FY 2026.
- Magnet schools and Open Choice program participants would receive 3 percent increases to their per-student grants, as the majority of state magnet and Open Choice funding in the Education Finance Reform line is eliminated.
 - \$2.1 million from the Education Finance Reform line item is used to provide per-student increases for magnet schools, and \$1.2 million to increase per-student grants for Open Choice.
- Charter school funding is adjusted to reflect enrollment changes and continues the current the phase-in of weighted student funding for charter schools.
 - \$7.5 million from the Education Finance Reform line item is used to fund the phase-in already in statute, although less than the original Education Finance Reform appropriation.
- There are no statutory changes to Vocational Agriculture (AgriScience) program funding, however, the appropriation is increased to account for actual enrollment.
 - \$1.2 million from the Education Finance Reform line item is used to fully fund the current statutory grant.
- The Connecticut Technical Education and Career System (CTECS) will receive funding for additional staff positions to meet federal special education requirements.
- \$5.3 million from the Education Finance Reform line item is used to continue the universal school breakfast program and eliminate the cost to students and their families for reduced-price lunch.
- The Excess Cost grant remains funded at FY 2024 levels.
- The Learner Engagement and Attendance Program (LEAP), which conducts home visits, would receive \$7 million from the General Fund to make the program permanent.
 - Funding for this proposal comes from the reallocation of the Education Finance Reform line item.

How do these proposed policy changes impact students and schools?

- The governor's proposed budget reduces state funding for K-12 education by \$62.9 million at a time when student needs are increasing and districts are facing a fiscal cliff with federal COVID-relief funds expiring soon.
- Districts that operate magnet schools or AgriScience programs, or participate in the Open Choice program, will not see the full benefit of the \$150 million investment that was made last legislative session and is currently in the state budget.
- The removal of the general education tuition cap will place an added fiscal burden on local public school districts whose students attend choice programs — resulting in lost savings that were anticipated and that could have been used to mitigate the impact of the upcoming fiscal cliff, increase in-classroom support, and continue or expand student services and programs.
- Students will benefit from increased funding as compared to FY 2024 through programs such as LEAP, free school meals, and support for CTECS.
- Districts will continue to receive partial reimbursement through the Excess Cost grant for the costs of educating students with extraordinary special education needs.

Analysis of Selected Appropriations

Table 1 below contains FY 2024 estimated expenditures for significant education grants, as well as the appropriations for those same grants in the governor's proposed state budget adjustments for FY 2025. The appropriations included in Table 1 are education grants to municipalities and school districts in which the total estimated expenditures exceed \$10 million in FY 2024, as well as state funding for school choice programs.⁴

State education appropriations that would increase — **as compared to the current adopted budget for FY 2025** — under Governor Lamont's proposed budget adjustments are highlighted in green, while those appropriations that would remain at current FY 2025 budgeted amounts are highlighted in yellow. State education appropriations that would decrease compared to current FY 2025 budget amounts are highlighted in red. The far-right column of Table 1 features the key policy details contained in the governor's proposed budget adjustments for each grant.

⁴ Although the Adult Education and Development of Mastery Exams line items exceed \$10 million in appropriations, they are not included in the below table due to their relationship to public K-12 education operating expenses.

Table 1: Selected FY 2025 State Education Funding under Adopted Biennial State Budget and Governor's Proposed Budget Adjustments⁵

Grant	FY 2024 Estimate	FY 2025 Adopted Budget	FY 2025 Governor's Proposed	Change in Appropriation After Governor's Adjustments	Key Policy Details

Analysis of Education Cost Sharing (ECS) Grant and Education Finance Reform Efforts

To distribute state education aid to towns for their local and regional public school districts, Connecticut uses the ECS formula, which was adopted in 2017 as part of the state budget and first used and implemented in FY 2019.

The biennial budget for FYs 2024 and 2025, which is currently in law, accelerated the phase-in schedule for historically underfunded districts, as well as maintained FY 2023 funding levels for overfunded towns by holding them harmless until FY 2026. Under Governor Lamont's proposed budget adjustments for FY 2025, no changes were made to the phase-in schedule. However, shifts in funding and enrollment changes resulted in \$5.7 million in increased funding for ECS grants, separate from re-allocations between line items.

The governor's proposed budget adjustments recommend substantial changes to the Education Finance Reform line item. The biennial budget includes \$150 million in new funding in FY 2025 for the purposes of Education Finance Reform and specifies allocation amounts for each school operator type. The current state budget does not include language for the method of allocating these resources. Additionally, the biennial budget limits magnet school and AgriScience tuition beginning in FY 2025 to 58 percent of the per-student amount charged in FY 2024 to sending districts — resulting in significant cost savings for local school districts.

Under the governor's proposed budget adjustments, the \$150 million for Education Finance Reform is eliminated and a portion of that funding is shifted to various education programs. The funding is used to provide small increases in per-student grants for magnet schools and the Open Choice program, continue the phase-in for ECS and charter schools, correct funding for AgriScience programs, and continue the LEAP home visiting program and universal free school breakfast and reduced-price meal subsidy. In total, when considering the proposed increases for programs previously not supported by the Education Finance Reform appropriation, the governor's adjustments decreased the state education funding promised under the Education Finance Reform line item by \$48 million.⁶

Table 2 below details the distribution of funding under the Education Finance Reform line item and under the governor's recommended budget adjustments for FY 2025.

Please note that adjustments in ECS funding levels — both at the town level and overall — in the governor's proposed budget are the result of the ECS formula annually accounting for changes in enrollment, student needs, and community wealth. The ECS funding levels in the governor's proposed budget DO NOT reflect a policy change or additional funding beyond what towns are currently entitled to under state statute.

⁶ Ibid.

Table 2: Education Finance Reform Funding by Grant Program for FY 2025 Under Adopted Biennial Budget and Governor's Proposed Budget Adjustments⁷

Program	FY 2025 Adopted Budget (in Millions)	Governor's FY 2025 Proposed Budget Adjustments (in Millions)	Change (in Millions)
Education Equalization (ECS)	\$68.5	\$74.2	\$5.7
State Charter Schools	\$9.4	\$7.7	-\$1.7
Magnet Schools	\$53.5	\$5.1	-\$48.4
Open Choice	\$11.4	\$1.2	-\$10.2
AgriScience	\$7.2	\$1.2	-\$6.0
School Meals	-	\$5.6	\$5.6
LEAP – Home Visiting	-	\$7.0	\$7.0
Total	\$150.0	\$102.0	-\$48.0

⁷ Ibid.

Table 3 below compares, town by town, the **estimated ECS grants** for FY 2025 under Governor Lamont's proposed budget adjustments with a comparison to estimated FY 2024 grant amounts and the FY 2025 grants under the current biennial budget. Towns projected to receive an increase in ECS funding in FY 2025 — **over their FY 2024 ECS grant amount** — are highlighted in green, while towns projected to receive the same amount of ECS funding are highlighted in yellow.

Please note that adjustments in ECS funding levels — both at the town level and overall — in the governor's proposed budget are the result of the ECS formula annually accounting for changes in enrollment, student needs, and community wealth. The ECS funding levels in the governor's proposed budget DO NOT reflect a policy change or additional funding beyond what towns are currently entitled to under state statute.

Table 3: Estimated Town ECS Grants for FY 2025 Under Adopted Biennial State Budget and Governor Lamont's Proposed Budget Adjustments⁸

Note: Budgeted appropriations may differ from final grant amounts made by the Connecticut State Department of Education (CSDE) to towns and school districts because final grant calculations take additional statutory provisions into account. Therefore, towns and school districts should wait for final grant amounts to be released by the CSDE before finalizing these amounts in their budgets.

*As Alliance Districts, these towns are held harmless from receiving a decrease in ECS funding even if the ECS formula would result in a decrease for these towns.

Table 4 below compares, town by town, the **estimated change** in ECS grants for FY 2025 under Governor Lamont's proposed budget adjustments compared to estimated FY 2024 grant amounts and the FY 2025 grants under the current biennial budget. Towns projected to receive an increase in ECS funding in FY 2025 — **over their FY 2024 ECS grant amount** — are highlighted in green, while towns projected to receive the same amount of ECS funding are highlighted in yellow.

Please note that adjustments in ECS funding levels — both at the town level and overall — in the governor's proposed budget are the result of the ECS formula annually accounting for changes in enrollment, student needs, and community wealth. The ECS funding levels in the governor's proposed budget DO NOT reflect a policy change or additional funding beyond what towns are currently entitled to under state statute.

Table 4: Estimated Change in Town ECS Grants for FY 2025 Under Adopted Biennial State Budget and Governor Lamont's Proposed Budget Adjustments⁹

Note: Budgeted appropriations may differ from final grant amounts made by the CSDE to towns and school districts because final grant calculations take additional statutory provisions into account. Therefore, towns and school districts should wait for final grant amounts to be released by CSDE before finalizing these amounts in their budgets.
